DETAILED ACTION

Applicants' response, filed 30 March 2007, has been fully considered. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Claims 1, 6-8, and 25-31 are currently pending. Claims 2-5 have been cancelled. Claims 7-24 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 16 August 2004.

Information Disclosure Statement

The Information Disclosure Statement filed 3/26/07, including the Freed reference has been considered. A signed copy of PTO form 1449 is included with this Office Action.

The Information Disclosure Statement filed 3/26/07, which refers to the Canadian patent application 2,336,361, has not been considered. The form is improper.

Claim Objections

Claims 1, 26, 27, 29, and 30 are objected to because of the following informalities:
Claim 1, step c) recites, "properties obtained in step b". There is a parentheses missing in the after "b". The claim should read "properties obtained in step b)". Appropriate correction is required.

Art Unit: 1631

Claim 28, step d) recites, “utilizing the calculated dimensions of step b or the chemical and/or electrostatic properties obtained in step c”. There are parentheses missing in the after “b” and “c”. The claim should read, “utilizing the calculated dimensions of step b) or the chemical and/or electrostatic properties obtained in step c)”.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 26 remains rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 recites, “a method of identifying a compound that is an allosteric modulator of an intermolecular interaction with a biological function intended to be modulated at a functionally critical site”. It remains unclear if the “intended to be modified” step is an active method step or not. Is the compound modified or not? Clarification is requested.

Claims 26 and 27 recite, “a method of identifying a compound that is an allosteric modulator”. Step d) recites, “testing said compounds in an in vitro assay to detect a compound that modulates the interaction at the functionally critical site...” It is unclear if step d) is the identification step or if it is a separate step. Clarification is requested.

Art Unit: 1631

Conclusion

Claims 6-8, 25, 28 and 31 are allowable, as the prior art does not teach or fairly suggest the method of identifying a compound that modulates intermolecular interaction between a functionally critical site of a target protein and a modifier comprising the steps set forth. Specifically, the prior art does not teach or suggest identifying a cavity that is a measurable distance from said functionally critical site and calculating the dimensions to identify compounds that modulate.

Claims 26 and 27 are rejected, as set forth above.

Claims 1, 26, 27, 29, and 30 are objected to as set forth above.
